

1. Key Definitions

- **Sprint:** A fixed duration during which the team completes a set of tasks.
- **Epic:** A large task that spans multiple stories.
- **Story:** A smaller, actionable task within an Epic.
- **Story Point:** A numerical value representing the effort required to complete a story, following a Fibonacci sequence (1, 2, 3, 5).
 - **Very Easy Task:** 1 Story Point
 - **Normal Task:** 2 Story Points
 - **Moderate Task:** 3 Story Points
 - **Difficult Task:** 5 Story Points

2. Sprint Breakdown

Sprint 1

Epic 1: Data Collection

- **USN1:** Gathering Data → 2 Story Points
- **USN2:** Loading Data → 1 Story Point

Epic 2: Data Preparation

- **USN3:** Handling Missing Values → 3 Story Points
- **USN4:** Creating Fields (e.g., Total Sites, % Endangered) → 3 Story Points
- **USN5:** Handling Inconsistency in Data (standardizing regions, formatting columns) → 3 Story Points

Total Story Points in Sprint 1: 12 (2+1+3+3+3)

Sprint 2

Epic 3: Data Visualization

- **USN6:** Bar Chart (Country-wise Distribution) → 2 Story Points

- **USN7:** Pie Chart (Endangered vs Safe Sites) → 2 Story Points
- **USN8:** Line Chart (Regional Inscription Trends) → 2 Story Points
- **USN9:** Map (Geographical Visualization) → 4 Story Points

Epic 4: Dashboard

- **USN10:** Developing Dashboard (Interactive Layout, Filters) → 5 Story Points

Epic 5: Story

- **USN11:** Developing Story (Guided Tableau Story with slides) → 5 Story Points

Total Story Points in Sprint 2: 20 (2+2+2+4+5+5)

3. Velocity Calculation

- **Total Story Points Completed:** 12 (Sprint 1) + 20 (Sprint 2) = **32**
- **Number of Sprints:** 2
- **Velocity:** $32 \div 2 = 16$

Your team's velocity is 16 Story Points per Sprint.

4. Project Logic Flow

1. Collect and Prepare Data (Sprint 1):

- Gather and load UNESCO dataset.
- Clean and preprocess (handle missing values, create calculated fields, standardize columns).

2. Visualize and Build Insights (Sprint 2):

- Create charts (bar, pie, line, map).
- Combine charts into an interactive Tableau dashboard with filters.
- Design a Tableau Story for step-by-step exploration.

3. Measure Progress:

- Sprint 1 delivers a clean, structured dataset ready for visualization.

- Sprint 2 delivers fully interactive dashboards and a story presentation.
- Velocity ensures predictable delivery for future enhancements.
